

LA CABANA: Commitment to the Environment

La Cabana is a Green Globe 21 Certified Resort. Its environmental committee or "Green Team" started operating in September 1997.

The environmental mission of the resort is to "commit ourselves to recognize our ethical and moral responsibilities as a global citizen and to encourage and motivate our community to bring about improvements and to protect our environment and surrounding waters of Aruba".

The efforts of the Green Team include:

- Solid waste minimization by practicing the '4 R's';
- Conservation and management of the natural resources energy and fresh water;
- To promote environmental awareness and education of its staff, guests, owners, suppliers and community;
- Waste water management, reuse of gray water in the garden;
- Involvement of the community through social activities and projects; and
- Replacement or reduction of hazardous chemicals by use of biodegradable chemicals.

Green Globe 21 (GG21) is a worldwide environmental certification program for sustainable travel and tourism. La Cabana has been a GG21 certified resort since 2000, and has also received the GG21 Achievement Award in 2000 for a large accommodation.

An assessment on the improvement or consistency in the resort's environmental policy is done annually by GG21 inspectors.

Internationally La Cabana is bench marked among large accommodations. Commitment is the key behind the success of this important environmental stewardship endeavor, where both the resort and the community at large benefit from a clean and healthy environment.
